

Diamond publication and Open Science at ULiège

DARIAH - Friday Frontiers webinar

Bernard Pochet, PhD (ULiège Library)

2024 (cc-by)

Presentation plan

- ① Aligning the stars
- ② The start of open science at the University of Liège
- ③ PoPuPS
- ④ ORBi
- ⑤ Other OS achievements
- ⑥ International positioning
- ⑦ The ULiège Open Science Roadmap
- ⑧ Conclusion

1. Aligning the stars

A growing academic institution opens to the world

- 10 faculties, more than 20 000 students...

A team of librarians with a strong interest in Open Access

- Paul Thirion (head librarian).
- Huge issues with subscription costs and with the “prestige” of the major publishers.

Bernard Rentier (maybe the most decisive)

- A vice-president, then president (from 2004 to 2015), strong advocate of Open Access.
- He strongly supports the creation of the Open Repository of the University (ORBi).
- He founded and chaired EOS - Enabling Open Scholarship (an international association promoting Open Access to scientific publications in universities, now disbanded).

1. Aligning the stars – Bernard Rentier (source: Wikipedia)

Bernard Rentier, born September 12, 1947 in Liège, Belgium, is a biologist and virologist. He was also the rector of the University of Liège, from 2005 to 2014 as well as the first vice-president of the Federal Council for Science Policy [1] from 2012 to 2023 and president of the board of directors of Wallonie-Bruxelles Enseignement [2] from 2019 to August 2021.

☰ Summary ▾

^ Career

A virologist and immunologist by training, he carried out his research at the *National Institute for Medical Research* (Mill Hill, London, 1975) and at the *National Institutes of Health* (Bethesda, MD, USA, 1976-1981) then at the *University from Liège*. He is the author of more than 250 scientific and popular publications [3]. His scientific work focused on influenza, measles and chickenpox. He chaired the European branch of the *Varicella-Zoster Virus Foundation* (1991-2004) and the *WAVE (Working against Varicella in Europe) committee*. He was vice-president of the *European Federation of Biotechnology* (1997-2004).

He was rector of the *University of Liège* from 2005 to 2014 [4].

He founded and chaired *EOS (Enabling Open Scholarship)*, an international association for the promotion of *open access* to scientific publications (*Open Access*) in universities, now dissolved, *Open Access* now being the subject, if not in form, at least in substance, to a consensus in scientific circles. He became an honorary doctor of the *University of Quebec at Montreal* in 2014 in recognition of his contribution to free access to scientific information and to the promotion of the values of *Open Access* around the world.

He was vice-president of the Belgian Federal Council for Science Policy [1], and president of *Wallonia Biotech Coaching sa* [5].

From 2019 to 2021, he chaired the board of directors of WBE (*Wallonie-Bruxelles Enseignement*, the organizing power of education of the Wallonia-Brussels Federation) [6].

In another register, he is president:

- of the *Société Libre d'Emulation de Liège*, which is dedicated to the promotion of arts and sciences,
- of the * *Great Liège Conferences* [7] *,

Enabling Open Scholarship Launched

Charles W. Bailey, Jr.

September 23, 2009

Open Access

A new organization for senior management in universities and research institutions, [Enabling Open Scholarship](#), has been launched.

Here's an excerpt from the [press release](#):

The aim of Enabling Open Scholarship (EOS) is to further the opening up of scholarship and research that we are now seeing as a natural part of 'big science' and through the growing interest from the research community in open access, open education, open science and open innovation. These, and other, 'open' approaches to scholarship are changing the way research and learning are done and will be performed in the future.

Enabling Open Scholarship (EOS) provides the higher education and research sectors around the world with information on developments and with advice and guidance on implementing policies and processes that encourage the opening up of scholarship. It also provides a forum for discussion and debate amongst its members and will be taking that discussion into the wider community.

EOS membership is for senior institutional managers who have an interest in — and wish to help develop thinking on — strategies for promoting open scholarship to the academy as a whole and to society at large.

The EOS website is a resource open to all. It provides background information, data and guidance material on open scholarship-related issues. In a limited access area, members can find announcements, news and discussions.

DIGITALKOANS OVERVIEW

DigitalKoans provides news and commentary on digital copyright, digital curation, digital repository, open access, research data management, scholarly communication, and other digital information issues. It is also available via an [RSS feed](#).

A [Digital Scholarship](#) publication. Digital Scholarship is a noncommercial publisher and it accepts no advertising. [Charles W. Bailey, Jr.](#) is the publisher of Digital Scholarship.

1. Aligning the stars – EOS

The current EOS board comprises:

- **Bernard RENTIER** (Chairman), Rector of the University of Liege, Belgium
- Tom COCHRANE, Deputy Vice Chancellor, Queensland University of Technology, Brisbane, Australia
- William DAR, Director General of the International Crops Research Institute for the Semi-Arid Tropics (ICRISAT), Hyderabad, India
- Stevan HARNAD, Canada Research Chair, Université du Québec à Montréal (UQAM), Montreal, Quebec
- Keith JEFFERY, Director of IT and International Strategy at the Science & Technology Facilities Council, Swindon, UK
- Sijbolt NOORDA, President of VSNU, the Association of Dutch Research Universities
- Stuart SHIEBER, James O. Welch, Jr. and Virginia B. Welch Professor of Computer Science in the School of Engineering and Applied Sciences at Harvard University and Director of Harvard's Office of Scholarly Communication
- Ian SIMPSON, Deputy Principal for Research and Knowledge Transfer, and Professor of Environmental Science, University of Stirling, UK
- Peter SUBER, Berkman Center for Internet & Society, Harvard University, Cambridge, USA
- John WILLINSKY, Khosla Family Professor of Education at Stanford University and director of the Public Knowledge Project at the University of British Columbia and Simon Fraser University, USA
- Alma SWAN (Convenor/Coordinateur), Director of Key Perspectives Ltd, Truro, UK

2. The start of open science at the University of Liège

- In 2001, members of **BICfB association** (*Bibliothèque Interuniversitaire de la Communauté française de Belgique*/Interuniversity Library of the French Community of Belgium) launched the **first Open Access institutional directory initiative: BICTEL/e (for PhD thesis)**.
- At first, we didn't talk about Open Science but about **Open Access**.
- In 2004, BICfB was considering the possibility of organizing **institutional repositories** at university academy level.
- From 2005, several **conferences** (inside the university) on the problem of journal costs... and the obsession with the IF (large audience).
- Hard reflection on the **solutions** to propose.

3. PoPuPS – the first OA project

PoPuPS is the **golden way OA-Diamond** solution of the university of Liège for Journals (created and managed by the library).

- His story began in **2004** with a study of a **proof of concept**: an online journal platform for all Belgian French-speaking universities (7).
- As this study did **not result in a funding decision**, the library of the University of Liège decided to create its own portal, based on **Lodel** Open Source software (by revues.org) platform.
- In **September 2006**, PoPuPS publish five titles online.

3. PoPuPS – home page

3. PoPuPS – basics

The main goals are:

- To provide editors with a **simple, cost-effective** solution for publishing and distributing their journal(s) or conference(s).
- To give editors **full editorial autonomy** and **independence**, and with maximum **visibility**.
- To be a **journal incubator** or enable existing journals to **switch** easily to open electronic distribution.

Journal editors who decide to publish with PoPuPS have to:

- Rigorously respect the major principles of **scientific quality**.
- Publish content at least **once a year**.
- Offer their services **free of charge** to authors (no APC!).

Acta Stereologica

Acta Stereologica (ISSN 0351-580X) a été publié de 1982 à 1999, date à laquelle il est devenu Image Analysis and Stereology. C'était le journal officiel de la Société internationale de stéréologie et en tant que tel, il a été le vecteur de publication des actes et articles les plus importants dans le domaine de l'analyse quantitative d'images et de l'interprétation tridimensionnelle de sections planes de matériaux ou de tissus. Continué comme analyse d'image et stéréologie.

Annales de la Société géologique de Belgique

La Société Géologique de Belgique a publié des articles et des documents originaux portant sur tous les aspects des sciences de la terre, avec un accent particulier sur la géologie régionale de la Belgique et de l'Afrique centrale.

Elle publia les **Annales de la Société géologique de Belgique** (ISSN 0037-9395) de 1874 (Vol. 1) à 1997 (Vol. 120).

SEPAS 2020 - Former des citoyens physiquement éduqués : un défi pour les intervenants en milieu scolaire, sportif et des loisirs. Un défi pour les intervenants en milieu scolaire, sportif et des loisirs - Liège 25-28 février 2020

Au cours de la 11ème Biennale de l'ARIS, la parole a réellement été donnée aux praticiens ! L'objectif principal de cette approche originale est de faire émerger des pratiques de terrain originales et porteuses d'avenir pour les domaines de l'activité physique, de

3. PoPuPS – visibility of journals, what we are doing...

DOI (Digital Object Identifier) via Crossref.

Search engines:

- Google Scholar.
- Google, Bing, Yahoo.
- Central Discovery Index (used with Primo and Summon discovery solutions).
- Isidore (for titles in the humanities and social sciences).

Knowledge bases:

- EBSCO (A-to-Z).
- Ex Libris ProQuest (SFX KB, Alma Community Zone and 360Link).
- Mir@bel (of which ULiège Library is a member).

3. PoPuPS – current projects

Improving the quality of the processes and information provided by all journals.

- Use of Quéro (Editorial Quality Criteria - thanks Françoise!) during Workshops.

Support journals in integrating:

- DOAJ (8/27).
- Sherpa-Romeo (3/27).
- Others (Bibliographic databases, Scopus...).

Anticipate the transition to Lodel 2 and:

- Continue using lodel.
- Use OJS (used for 3 titles) but development to improve online posting of articles in html.
- Use Kotahi (Coko foundation) but little community of users and still under development.

We need to review the editorial model of journals, some of which were created in 2007.

3. PoPuPS – the editorial model with Lodel

The screenshot shows the Lodel web interface. At the top left is the logo "lodel" with the tagline "Logiciel d'édition électronique". The top right corner displays site information: "Site: 1786-4507", "Utilisateur: pochet (Administrateur Lodel)", and options for "Déconnexion" and "Vider le cache". A navigation bar below the logo contains tabs for "Edition", "Tableau de bord", "Information", "Index", "Site", "Administration", and "Messagerie interne". Below this is a search bar with "Parcourir", "Chercher", and "Options du site" buttons, and a search input field with "Chercher" and "OK" buttons. The main content area is titled "Racine" and shows a tree view of the site structure. Under "Racine du site", there are two main categories: "Publications" and "Sites". The "Publications" category is expanded, showing a list of items. Each item has a green circle icon, a document icon, a title, and a list of actions: "Voir", "Éditer", "Dépublier", and "Supprimer".

Abstract

Introduction. Reversible lesions in the splenium of the corpus callosum are a recognized radio-clinical entity, which is rarely associated with idiopathic intracranial hypertension, especially in children. We present a case.

Case report. We describe the case of an 11-year-old prepubescent female patient with no significant medical history. She presented with idiopathic intracranial hypertension syndrome and exhibited a nodular lesion in the splenium of the corpus callosum on the MRI scan. Initial medical treatment with acetazolamide and a subtractive lumbar puncture failed to improve the patient's condition. Consequently, an emergency ventriculoperitoneal shunt procedure was performed, resulting in a favorable clinical outcome. A follow-up MRI was conducted six months later, revealing normalization of the imaging results.

Conclusion. Further studies are needed to understand the pathophysiology of reversible lesions in the splenium of the corpus callosum during idiopathic intracranial hypertension.

4. Creation of ORBi (Open Repository and Bibliography)

ORBi is the **green way OA** solution of the university of Liège (created and managed by the library).

- First budget allocated by BICfB.
- **DSpace** open-source software (MIT).
- **2007**: “**Liège model**” = linking institutional repository with researcher evaluation. Only deposited publications are considered.
- **Over 90% deposit** of institutional publications.
- Dissemination:
 - ORBilu in 2013 (University of Luxembourg).
 - ORBiMons in 2022 (Mons University).

When people talk about ULiège, it's more for ORBi than for PoPuPS!

5. Other OS achievements – DOnum (Digital Object Repository - 2009)

The screenshot displays the DOnum website interface. At the top, the logo "DOnum" is prominently displayed, with the tagline "Dépôt d'Objets Numérisés" below it. Navigation links include "University of Liège | ULiège library | Login | EN", "Browse/Find", "Discover our collections", "Virtual libraries", and "About".

A featured banner at the top shows three architectural drawings of churches. Below this is a search bar with the text "for" and a "Search" button, along with a link to "Advanced search".

The "DOnum blog" section features an article titled "Bibliophilie et librairie à Bruxelles à la fin du XVIIIe siècle : retour sur la figure de Josse Ermens (1736-1805)". The article text discusses the 18th-century book market in Brussels, mentioning the suppression of religious convents and the emergence of private libraries. A "Lire la suite" link is provided at the end of the article.

The "Recently added" section lists three items, all authored by Paul Lohest:

- Épigraphie. Province de Liège, Fardes 187 : Liège : St André - ((entre 1875 et 1909))
- Épigraphie. Province de Liège, Fardes 190 : Liège : Ste Catherine - ((entre 1875 et 1909))
- Épigraphie. Province de Liège, Fardes 191 : Liège : St Christophe - ((entre 1875 et 1909))

Below this is a "Type" filter set to "Book" with a count of 4662. A vertical "feedback" button is visible on the right side of the page.

[Advanced search >](#)

MatheO (Master Thesis Online) est le portail d'accès aux **mémoires de master** de l'Université de Liège.

Ce projet, mené par les bibliothèques, vise non seulement à apporter une solution au problème de l'**archivage** « papier » et de la **conservation pérenne**, mais aussi à offrir une **accessibilité** et une **visibilité** beaucoup plus larges à ces travaux d'étudiants dont bon nombre sont de qualité. Les mémoires, sans être de véritables publications scientifiques, représentent un travail et un effort scientifique considérable de la part des étudiants de dernière année de master qui y consacrent souvent de nombreux mois. Ils méritent de ne pas rester enfermés sur des étagères obscures.

De plus, ce projet permet la mise en place d'un processus de dépôt automatisé intégrant notamment un contrôle « **anti-plagiat** ». Enfin, il s'inscrit dans la volonté des bibliothèques de participer activement au rayonnement de l'institution et de l'ensemble de sa production scientifique, ainsi que dans notre dynamique **open access** (voir ORBI, PoPuPS).

Si vous souhaitez nous faire des suggestions, n'hésitez pas à nous contacter via le bouton « Feedback » !

This dataset contains enriched metadata of journal articles published between 2018 and 2020 and for which at least one (co)author is affiliated with the University of Liège. Data was aggregated and enriched from various sources, including OpenAlex and the University of Liège's ins...

TopUp Docker

1 déc. 2023

Phillips, Christophe; Grignard, Martin; Sherif, Siya, 2023, "TopUp Docker", <https://doi.org/10.58119/ULGI-ADYEJF>, ULiège Open Data Repository, V1

This a lightweight Docker containerized version of the FSL's "TopUp" tool, cf. <https://fsl.fmrib.ox.ac.uk/fsl/fslwiki/topup>

Dataset for paper: "Quantifying the electron energy of Mars aurorae through the oxygen emission intensity ratio at 130.4 and 135.6 nm" 

6. International positioning (Main)

ULiège

- Founding and chairmanship of **EOS** (2009-2012).
- University is a full member of **EUA** (European University Association).
- Observer member of **EOOSC** via the Rectors' Council. Our head librarian (Paul Thirion) is one of the two representatives.
- University is member of **COARA** (Coalition for Advancing Research Assessment).

ULiège Library

- Is member of **OPERAS** (SIG Tools & Platforms), **Mir@bel** and **Repères** networks.
- Participes actively in the creation of a Belgian network of OA diamond journals: **Reliade**.
- **COARA project underway** (creation of a new international diamond OA journal).

ULiège Library

Nom ULiège Library

Détail Bibliothèque de l'Université de Liège

Site web <https://lib.uliege.be/>

Localisation Liège, Belgique

Les données suivies par ce partenaire dans Mir@bel

- 27 revues
- 1 ressource

Actualités dans Mir@bel

Octobre 2019

Nouveau partenaire dans Mir@bel : l'ULiège Library

L'[ULiège Library](#) rejoint le réseau Mir@bel en tant que membre veilleur.

L'objectif est notamment de suivre toutes les revues qui sont diffusées sur la plateforme de diffusion en libre accès [PoPuPS](#) (Portail de Publication de Périodiques Scientifiques).

Bienvenue à ce premier partenaire belge dans Mir@bel !

6. International positioning – Repères

Les pépinières qui participent au réseau Repères

- 16 plateformes fédérées
- 80 personnes
- Maillage territorial
- Organisation en pôles éditoriaux
- Des organisations locales variées

7. The ULiège Open Science Roadmap (2024)

63 ambitious engagements from the University of Liège

in an Open Science roadmap

- Open Access
- Open /FAIR Data
- Open Peer review
- Open Source
- Open Education
- Open Laboratory
- Citizen
- Open ...

7. The ULiège Open Science Roadmap (2024)

63 commitments by the university to:

- Support scientists.
- Increase Open Access.
- Develop Open Data.
- Support Open Software.
- Support Open Education.
- Develop Citizen Science.
- Pay attention to Evaluation and Integrity.

7. The ULiège Open Science Roadmap (2024)

Prepared by:

- ULiège Library.
- RISE (Department for Research & Innovation Support).

Approved on January 2024 by the Board of Directors of ULiège (after two years of preparation/negotiation).

8. In conclusion

To go forward, you need:

- the right people at the right time and the right place.
- strong networks.
- resources (human and financial)... but we don't have enough of them.

It is important to train and communicate:

- courses for students.
- training for PhD candidates.
- special days (Open Science day...).
- website, messages, flyers...

for ULiège, the library has played and continues to play a key role for Open Science!

Thank You for Your attention!¹
